Its boutique for a reason

Investment Manager and Regulatory Host, Mirabella Financial Services LLP previously seconded the team at Staude Capital, a London based investment firm founded by Portfolio Manager Miles Staude and ex-Metage personnel, who have effectively occupied the role in managing the Global Value Fund (ASX:GVF) since listing in 2014.

Unlike more traditional asset managers, Staude Capital specialises in providing an alternative source of market outperformance over common global equity selection strategies, with similar through the cycle returns, but at a risk profile that is deemed to be materially lower by identifying and capturing the value presented by arbitrage opportunities and discounted assets globally. This is predominantly conducted on a look-through basis, with GVF historically favouring closed ended funds trading at a price lower than the intrinsic or book value to which each asset could be sold for individually. Discount contraction is released through a proprietary series of passive and active engagement strategies while also allowing for the Manager to participate in the underlying return on each investment. The portfolio also includes an exposure to listed debt instruments, equities and derivative contracts (for currency management purposes).

It is our opinion that GVF is underappreciated at just under par in the current climate. Since listing at \$1.00 p/s the company has returned 57.2c in grossed up dividends paid to shareholders while generating a total return of 11.1% p.a. since inception through to 28 February 2022 (considered after fees and expenses but excluding the effects of tax). Volatility during the tenure is 8.4% annualised. The MSCI All Country World Price Index in AUD, meanwhile, has generated an equivalent return of 10.3% p.a. Importantly we believe that further spreads on the net investment returns, as exhibited in Figure 3, will give rise to scope for further positive dividend quidance, as has been the case in the previous years. The market appears to be pricing in a perpetuity of constant dividends, which is unlikely to be the case for a listed investment company crystalising profits through trading

strategies supplemented further by investment income. Moreover, the fund exhibits a low beta relative to global equity markets, providing for a differentiated source of alpha generation that flows through from capital gains into investors' pockets.

There remains key reliance on the Manager in successfully realising the value from mispriced securities through its discount capture strategy, however we would contend that this risk is ameliorated through the soft indicative cap on assets under management (circa \$300m), allowing for nimble investment in niche areas, and recent senior hires in the investment team. Miles Staude and James Dow are now supported by Mark Ambrose, who previously spent ~10 years as a desk strategist and specialist salesman on the investment companies team at Jefferies in London prior to joining Staude Capital in March 2020. An Australian office has also been signposted for opening later this year, which is another positive aspect of focus on the business that is supportive of the ongoing shareholder engagement and trading on the secondary market.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

# **BÉLL POTTER**

Measurement of LIC performance is calculated after all operating expenses, provision and before the payment of taxes (after realised capital gains taxes if reported by the Company). Performance also assumes the reinvestment of net dividends, but does not incorporate franking.

### **BELL POTTER**

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.

*Refers to the current share price divided by the Indicative Pre-Tax NTA as compared to the average 6m, 1y, 3y and 5y Discount/Premium share price to pre-tax NTA as at end of the previous month, over the relevant time period of 1, 3, 5 and 10 years. +Refers to the current share price divided by the Indicative Pre-Tax NTA as compared to the average 6m, 1y, 3y and 5y Discount/Premium share price to pre-tax NTA as at end of the previous month, over the relevant time period of 1, 3, 5 and 10 years.

BELL POTTER

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.
