# BELL POTTER 29 AUGUST 2025

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.
