Market Summary

- The Board of Directors of WAM Income Maximizer Limited (WMX) have called an Extraordinary General Meeting (EGM) for the company's shareholders to grand the issuance of 75 million additional shares just months after listing, due to a period of strong trading demand and consistent trading of the LIC at above its NTA. The calling of the EGM is due to a restriction placed by Listing Rule 7.1 which limits companies in issuing 15% of the fully paid ordinary securities it had on issue at listing, for 12 months post listing date. If successful, the company will almost double in size, providing greater on market liquidity for investors and add to the growing income-oriented equity LIC market. Since launching in April, the manager has deployed proceeds of the IPO in both debt and equity positions in May whilst having announced the company's maiden dividend to be paid in August. The announcement of the company's first dividend of 0.20 cps in August, comes after a period of strong portfolio performance, resulting in the receipt of both income and the realization of gains in order to support the payment. WMX targets a gross income return of the RBA Cash Rate + 2.5% per annum, which is dependent on the sustained growth of the company's profit and franking credit reserves
- Revolution Asset Management announced last week the intention to launch their first listed vehicle, the Revolution Private Debt Fund II (REV, proposed), adding to the private credit LIT sector which has grown in competition. The trust will invest in a portfolio which is primarily comprised of senior secured loans within private companies, leveraged buyout debt, private ABS, public ABS and real estate debt. Since the launch of the unlisted wholesale class of the fund in December 2019 (APIR: CHN2868AU) it has returned 6.6% p.a. (net), exceeding the cash rate by ~4.5%.

- The Regal Investment Fund (RF1) has announced a change to the investment guidelines which govern its portfolio, to provide the manager greater flexibility around holding unlisted investments. In the announced changes, the manager will be able to hold up to 25% of NAV in unlisted securities at the time of investment (excluding Regal Funds) and single unlisted security positions will be capped at 3% of NAV.
- WAM Global Limited (WGB) announced an increase to its final dividend, payable in November, after a period of strong returns within the underlying investment portfolio. Over the last 12 months to 30 June 2025, WGB reports a pre-tax NTA return of 14.7% and a share price return of 19.4%, resulting in the narrowing of the LICs trading discount from ~9% to trade at NTA currently.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

BELL POTTER

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.
