It's all about performance

As we move through a period of divergence in the premium and discount trading relationship of listed closed ended funds, it becomes important to reassess the relative performance of the funds with their respective benchmarks and how this may influence trading activity. Across the funds under our coverage, we have observed a positive correlation between pretax NTA returns in excess of a funds benchmark over the last three years (including net dividends) and our indicative trading premium/discount.

There are many strategies which have outperformed their benchmark and command a premium to NTA, these include WCM Global Growth Limited (WQG), Pm Capital Global Opportunities Fund Limited (PGF) and Perpetual Credit Income Trust (PCI). Conversely, LICs which have underperformed their benchmark over three years including Naos Ex-50 Opportunities Company Limited (NAC), Pengana International Equities Limited (PIA) and VGI Partners Global Investments Limited (VGI) all trade at a discount to their respective NTA's.

Figure 1 - Strategies that outperform their respective benchmarks tend to trade at a premium to NTA

SOURCE: BELL POTTER RESEARCH. BUBBLES WEIGHTED BY MARKET CAP

The relationship observed here does omit the tax mismatch between LIC returns and market benchmarks but however does highlight the strong market demand outperforming funds receive compared to the rest of the market. Notably, there exists a group of specialist strategies which have outperformed their respective benchmarks however trade at a discount to their pre-tax NTA, such as the Lowell Resources Fund (LRT) and Bailador Technology Investments Limited (BTI). This may be due to the specialized nature of each funds mandate and/or the nature of the underlying investments held in the strategy.

On face value the observed relationship is intuitive, given outperforming funds may have greater capacity to realize capital gains over time, generating franking credits and providing an additional mechanism of returns for investors.

Pengana grows the book

The Pengana Global Private Credit Trust (PCX) announced a one for two entitlement offer last week to raise up to \$82 million for the trust. Proceeds from the offer will be used to invest in new opportunities within the funds universe, being a portfolio of private credit funds based predominately in the US and Europe. The strategy is structured as a fund-of-funds through the use of an external investment consultant in Mercer, providing look through exposure to a portfolio of over 3,500 private credit loans across 24 underlying funds. The manager has stated that the entire proceeds of the offer will be deployed within the first full month following their issuance, in order to reduce the impact of a cash drag on total returns. The decision to launch the funds entitlement offer comes after a period of sustained share price premium to NAV, with units in PCX trading at an average 1.1% premium to NAV over the last year.

BELL POTTER 3 OCTOBER 2025

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

^{*}LTM Dividend is the sum of dividends paid over the last 12 months, excluding any special dividends paid. #Franking assumes a tax rate of 30%, actual company tax rate applied may differ. Andicates yields are annualized (for products launched <12 months ago or changed dividend policy)

BELL POTTER

We have enclosed a reference page for dividends. We have used historical dividend data for the dividend information, and manager guidance where appropriate. Please note that historical dividends are no guarantee of future dividends to be paid.

BELL POTTER

Measurement of LIC performance is calculated after all operating expenses, provision and before the payment of taxes (after realised capital gains taxes if reported by the Company). Performance also assumes the reinvestment of net dividends, but does not incorporate franking. As at 31 August 2025

BELL POTTER

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.

^{*}Refers to the current share price divided by the Indicative Pre-Tax NTA as compared to the average 6m, 1y, 3y and 5y Discount/Premium share price to pre-tax NTA as at end of the previous month, over the relevant time period of 1, 3, 5 and 10 years. +Refers to the current share price divided by the Indicative Pre-Tax NTA as compared to the average 6m, 1y, 3y and 5y Discount/Premium share price to pre-tax NTA as at end of the previous month, over the relevant time period of 1, 3, 5 and 10 years.

BELL POTTER

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.

BELL POTTER

A number of LICs under our coverage currently have options outstanding. Options dilute the NTA when exercised and therefore have an impact on the Premium or Discount on a look through basis.
