#### **WAM Global Options Issue**

The WAM Global Limited (ASX:WGB) Board of Directors have announced a onefor-one bonus issue of options to all shareholders at nil consideration. The \$2.54 strike American options will be quoted and trade on ASX under the code "WGBO" from 15 March 2021, having an 18 month tenure until expiring on 12 September 2022 (if not duly exercised). WGB has 212.7m ordinary fully paid shares on issues, with a market capitalisation of \$553.1m based on the last closing price of \$2.60 per share. Assuming that the 212.7m options issued in accordance with the prospectus are subsequently exercised, the size of the company will effectively double to a market capitalisation of \$1.1bn, raising \$540.3m in additional equity capital. Shareholders who exercise their right to acquire new WGB shares on or before 26 May 2021 will also be entitled to the fully franked FY21 interim dividend of 5 cents per share, which represents a LTM fully franked dividend yield of 3.5% (5.1% grossed up) based on the options exercise price of \$2.54. WGB reported profit reserves of 43 cps (as at 31 December before provision of the declared 5 cps FY21 interim dividend), which translates to a net dividend coverage of 4.8x years.

WGB was the only public equity mandated Wilson Asset Management LIC to trade at a discount relative to net tangible asset backing as at 31 January 2020 (-1.4%). Excluding the month of the float, WGB is yet to trade at a premium, recording an average discount of -10.3% since inception in June 2018. Given the last closing share price of \$2.60 and the 31 January 2020 NTA (after tax and before tax on unrealised gains) of \$2.46, a 100% take-up at this stage would be non-dilutive. resulting in a net tangible asset backing accretion to \$2.51 (50%, \$2.50) and an effective premium of 3.5% (50%, 3.9%) on a look through basis.

Options are being regularly omitted from LIC listings as managements instead opt to cover the initial fee, ensuing the company continues to trades at NTA. As seen in the case with **WAM Leaders Limited (ASX:WLE)**. large option overhangs can result in a depressed share price that trades at a discount relative to NTA until options expire or lapse. While options may increase AUM and result in a higher fee base for the manager, they also incentivise strong portfolio performance which is then reflected in a higher share price, in turn crystalising value imbedded within each option. However significant overhang, such as in a one-for-one bonus issue of options, may protract or reverse this declining discount, offering an attractive opportunity for shareholders to their investment and exposure to global equities with income diversification.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

<sup>\*</sup>LTM Dividend is the sum of dividends paid over the last 12 months, excluding any special dividends paid. #Franking assumes a tax rate of 30%, actual company tax rate applied may differ.

## **BELL POTTER**

We have enclosed a reference page for dividends. We have used historical dividend data for the dividend information, and manager guidance where appropriate. Please note that historical dividends are no guarantee of future dividends to be paid.

## **BELL POTTER**

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.
