#### PM Capital to consolidate

PM Capital Global Opportunities Fund (PGF) and PM Capital Asian Opportunities Fund (PAF) have entered into a Scheme of Arrangement, under which it is proposed that PGF will acquire the remaining share capital in PAF, of which it does not already own (80.1%), creating a combined entity with 9,600 shareholders, pro-forma market capitalisation of \$702.1m and portfolio pre-tax net tangible asset value of \$721.5m (as at 10 September based on the disclosed after-tax NTA exchange ratio, adjusted for proceeds and shares issued under the recent PGF SPP and assuming that tax liabilities are incurred from liquidation). The swap is expected to result in after-tax NTA per share neutrality for both PGF and PAF, but on paper appears accretive for PAF shareholders, significantly boosting market liquidity and the share register, while gaining access to the manager's superior global investment strategy and performance track record, also implying \$1.26 of pre-tax NTA per PAF share, equivalently a premium of 7.7% to PAF's pre-tax NTA of \$1.17 (same methodology). The Scheme Meeting date is set for December 9 this year.

### KKR deepens initiatives

KKR Australia Investment Mgmt, in capacity as Investment Manager; and Perpetual, as Responsible Entity of the KKR Credit Income Fund (KKC), have stated that they are committed to removing the discount through any means necessary, having proposed to introduce and deepen a series of initiatives in addition to those announced earlier in the year, by:

• Resuming the on-market buy-back.

- · Considering the intricate establishment of an unlisted credit fund with the ability to purchase units in KKC.
- · Broadening unitholder disclosures and engagement through regular written and video content that can be accessed on the KKR website.

Recent historical motivations also include:

- Full deployment of the \$20m allocated on-market buy-back by the end of FY21.
- Change in the distribution frequency from a quarterly to monthly basis, which commenced on 1 July 2021.
- Distribution guidance for FY22 of 4.8% based on a \$2.50 IPO price, compared to the target 4%-6% p.a. through the cycle rate of return.

### Further funding for tech unicorn

SiteMinder, a world leading hotel channel management and distribution solutions platform for online accommodation bookings, and notable inclusion in the Bailador Technology Investments (BTI) portfolio, has closed a pre-IPO \$100m funding round led by Fidelity International. Fidelity now joins the likes of AustralianSuper, BlackRock, Ellerston Capital, Pendal Group and Washington H. Soul Pattinson and Co as shareholders. A similar sized raise of over \$100m was conducted in January 2020 prior to the pandemic. The latest equity raising sustains an implied enterprise value of over \$1bn, and as such, BTI's carrying value will remain unchanged at \$82.5m.

SiteMinder sustained revenue in excess of \$100m for FY21, experiencing revenue decline of less than 6%, while also achieving a 40% increase in the number of active customers across its developing product suite. Further capital expenditures should place the firm in a favourable position to benefit from recovery in the global travel industry, particularly in the many travel markets where the company is seeing bookings bounce back to pre-pandemic levels.

In May 2021 SiteMinder launched SiteMinder Multi-Property, a product designed to simplify the complexities involved with distribution for hotel chains and groups. An early adopting customer reported significantly reduced operational inefficiencies, from as much as 160 hours to as little as 5 minutes, while another was able to refocus the time of 10 hotel staff.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.
