Big Win For The Little Guys

Spheria Emerging Companies Limited (SEC) reported an investment portfolio value increase of 56.0% for the twelve-month period ended 30 June 2021, outperforming the benchmark S&P/ASX Small Ordinaries Accumulation Index by 22.8%. Annual net asset backing growth, inclusive of net dividends returned to shareholders was 54.3%, as compared to 33.2% for the benchmark.

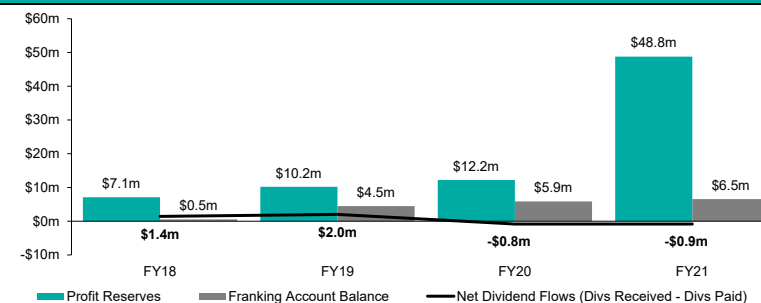

The result has led to the resolution of increased dividends, with the Board of Directors declaring a fully franked final dividend of 5 cents per share. This, coupled with the 3.5 cent per share interim dividend takes the FY21 annual dividend to 8.5 cents, an increase of 55% on the FY20 annual dividend of 5.5 cents per share in recognition of strong profit for the year. This is equivalent to a yield of 3.5% (4.9% including franking) on the 26 August closing share price of \$2.46. Based on the current number of shares outstanding, an annual fully franked dividend of 8.5 cents per share would utilise ~\$5.1m of profit reserves and ~\$2.2m of franking reserves. The Board has also announced a new dividend target yield of 4.0% p.a. (5.4% including franking), as calculated with reference to the NTA for FY22. The intention also includes a revision to more frequent quarterly payments, with dividends to be paid at a level of 1% on the NTA per quarter (1.35% including franking), based on an NTA calculated with reference to the end of each calendar quarter. The first of these quarterly dividends will be declared based on the 30 September 2021 NTA.

The manager is a fundamental investor with a focus on smaller and micro cap companies, favouring lowly geared businesses with strong positive free cash flow generation and encouraging free cash flow multiples. We view the investment strategy as supportive of the revised dividend policy and the objective to provide shareholders with capital growth, portfolio diversification and income. Free cash flow analysis quantifies the actual cash generation from operations that can be invested in future projects or freely distributed to shareholders. Although these firms are operationally small, they are unlikely to be in the same expansion stage as private companies, instead residing in stable business environments, mispriced as a result of lower than expected earnings. The investment approach is intuitively appealing as it combines the benefits of both growth and value investing, in a landscape where investors overreact to negative earnings prospects that may be a result of reporting standards.

Magellan High Conviction Trust Set To Delist

After an announced transition on 1 July 2021, **Magellan High Conviction Trust (MHH)** has now formally received the requisite unitholder and regulatory approvals. The virtual meeting saw all resolutions relating to the proposed transition to an open-ended active ETF, quoted on the ASX, passed by the requisite majority. Approximately 90% of valid proxy votes were cast in favour of all three resolutions. Units in the trust are expected to commence trading on the ASX under the ticker MHHT from Tuesday 31 August 2021. The result reaffirms the ongoing and simultaneous boom and bust within the sector. Highly differentiated managers focused on total returns continue to drive FUM growth. MHH will be removed from our LIC/LIT sector research and feature in forthcoming ETF reports.

BELL POTTER

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LIC's underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, where applicable, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

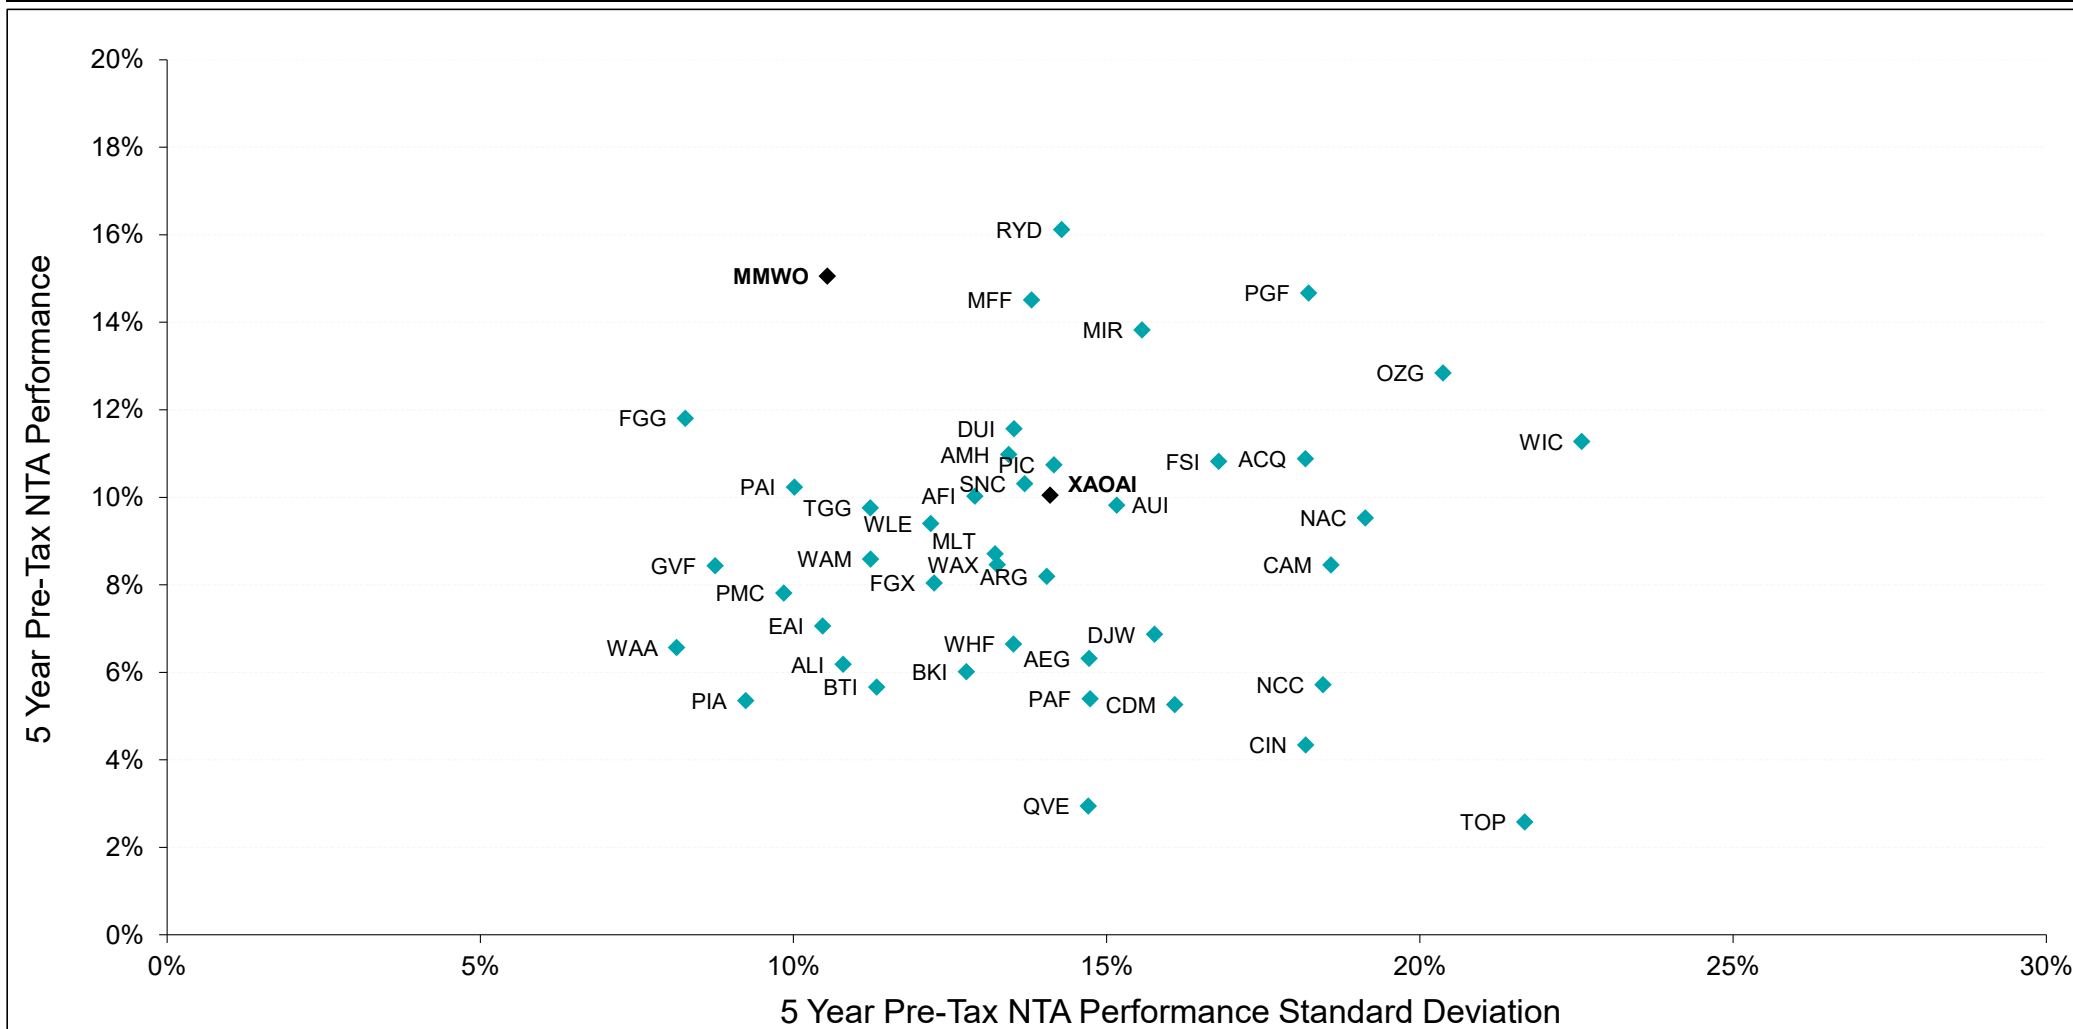

Chart 1: 3 Year Pre-Tax Performance v Standard Deviation

Source: IRESS, Bell Potter Estimates

Measurement of LIC performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and assumes the reinvestment of dividends, but does not incorporate franking. XAOAI is the S&P/ASX 200 Accumulation Index, MMWO is the MSCI World Net Total Return Index (in AUD).

Chart 2: 5 Year Pre-Tax Performance v Standard Deviation

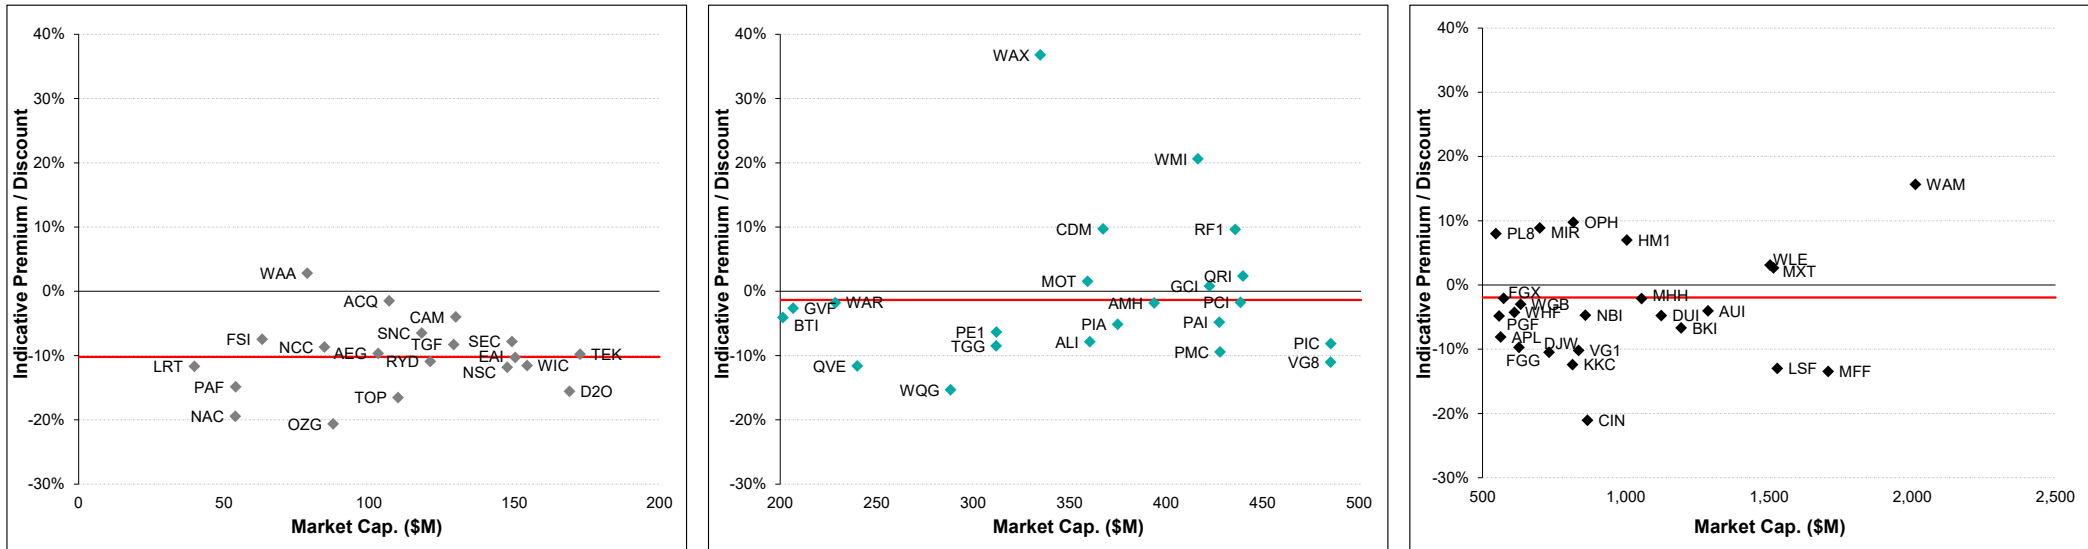

Source: IRESS, Bell Potter Estimates

Measurement of LIC performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and assumes the reinvestment of dividends, but does not incorporate franking. XAOAI is the S&P/ASX 200 Accumulation Index, MMWO is the MSCI World Net Total Return Index (in AUD).
