Rare discount capture opportunity

Future Generation Global Investment Company Limited (FGG) is a LIC that invests in internationally focused fund managers across a diversified spread of three broad equity strategies: long equities, absolute bias, quantitative strategies, and cash. In place of a management fee, FGG pays an annual investment to select charities equal to 1.0% of the net tangible asset (NTA) value. With investments across 12 different fund managers at the end of May 2020, FGG is less exposed to the specific active investment management risks of investment performance and strategy risks, key personnel losses, and concentration risks. FGG's exposure to multiple fund managers and cash (11.5% of gross assets at the end of May) would be expected to provide returns similar to the MSCI AC World Net Return Index (A\$) less the annual charitable donation and expenses, and the underlying portfolio has done just that. Despite this, the share price has traded at an average discount wider than 20% this calendar year.

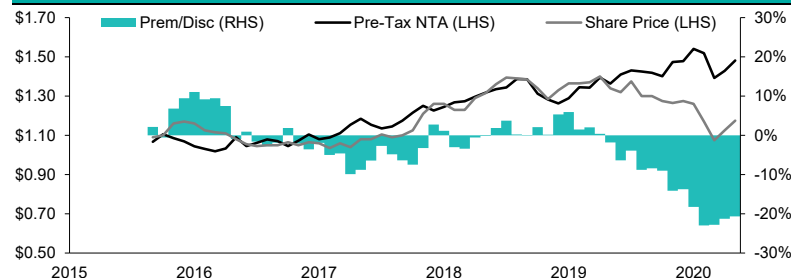

It is our view that FGG is underpriced at a 20% discount to the pre-tax NTA. The investment portfolio has outperformed the MSCI AC World Index (A\$) by 0.3% p.a. since inception, with a standard deviation 1.5% lower¹. This is while holding a direct cash exposure as well as the underlying funds also holding cash. FGG's investment committee report in the December 2019 Annual Report highlighted that the portfolio had a beta of 0.81 and an active position in cash of 27.2%².

Figure 2 - FGG premium/discount since inception

SOURCE: COMPANY REPORTS, IRESS, BELL POTTER RESEARCH. AS AT 31 MAY 2020

FGG has the added objective of aiming to change the lives of young Australians affected by mental illness in addition to investment performance shareholders. The charitable donations are essential to achieving this. It may then be unlikely that the Board will choose to engage in an on-market buyback to address the wide discount that the shares have been trading at. Buybacks and the subsequent share cancellation will benefit the existing shareholders by increasing the NTA per share and provide added liquidity on the market. However, this will ultimately decrease the total NTA and the 1.0% charitable donation amount. The wide discount can be addressed in other ways including increased marketing and further strong investment performances.

NBI reduces target return from 5.25% to 4.50%

NBI Global Corporate Income Trust (NBI) has announced an FY21 target distribution of 4.50% p.a. (net of fees and expenses), which equates to 0.696 cents per Unit paid monthly. This is a decrease of 0.75% from the 5.25% p.a. target since listing.

BELL POTTER

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA[^] and adjusted discount[^], which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

BELL POTTER

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.

Chart 1: 3 Year Pre-Tax Performance v Standard Deviation

Source: IRESS, Bell Potter Estimates

Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking.

Chart 2: 5 Year Pre-Tax Performance v Standard Deviation

Source: IRESS, Bell Potter Estimates

Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking.

Chart 3: Premium/Discount Relationship Across Market Cap (Equal-Weighted Average Indicated by Red Line)

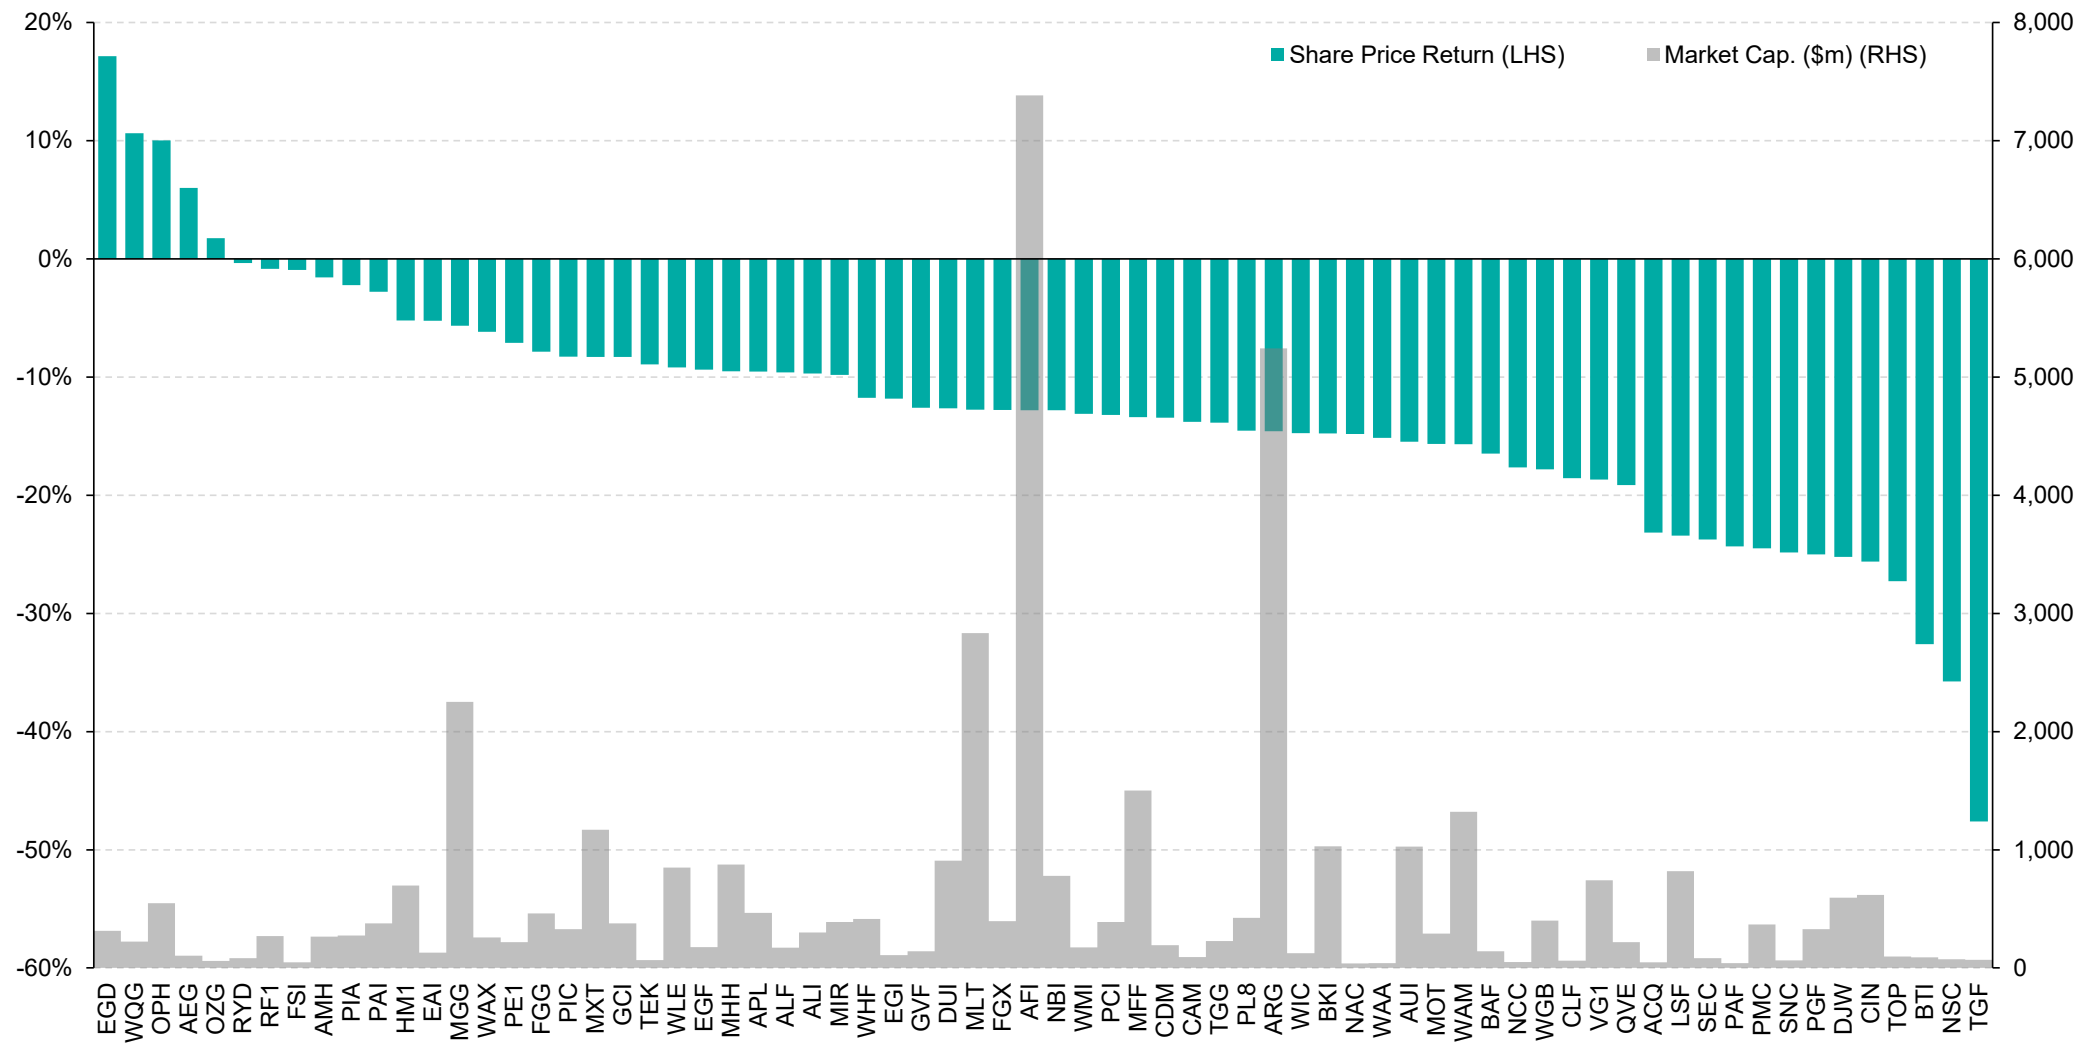

Source: IRESS, Company Data, Bell Potter Estimates

Chart 4: 5 Year Historical Premium/Discount Tracker by Market Capitalisation

Source: IRESS, Company Data, Bell Potter Estimates

Chart 5: Share Price Performance since 31 December 2019 (Including Net Dividends)
